Letter of Motivation for the Master programme in Data Science

Dear Admissions Team,

I am writing to apply for a place in the Master programme in Data Science at Muster University. Working with data has fascinated me since my bachelor studies, and I would like to turn this interest into my profession.

In 2026, I completed my bachelor degree in Business Informatics at Muster University Berlin. In my studies I learned to work with Python and SQL and to prepare data for analysis. In an internship in the data team of a Berlin company I helped to clean data sets, build simple dashboards and present results to colleagues.

I bring analytical thinking, patience and a careful way of working. I enjoy solving difficult problems step by step and I learn new tools quickly. I like working in a team and I take responsibility for my tasks.

I would be glad to hear from you about my application. I look forward to telling you more about my studies and my motivation.

Kind regards
Julia Krüger
